SUMMARY

A lifelong technology enthusiast, I've been immersed in IT since childhood, from Windows and software to system navigation. Today, I apply that foundation and a creative mindset to solve complex problems.

SKILLS

Programming Languages

- Python, Java, Javascript, C#, PHP

Frontend:

- React.js, HTML, CSS

Databases

- MySQL
- PostgreSQL

IDEs

- Visual Studio Code
- IntellJ
- PyCharm

General Skills

- OS commands (Windows & Linux)
- Hardware Troubleshooting & Repair
- IT Administration (system setup, user management, maintenance)

WORK EXPERIENCE

Cityray Technology China Limited Intern

(August 2026 - September 2026)

- Collaborated with a development team to build a SaaS platform connecting registered elderly individuals with volunteers which now has over 2 thousand active users.

Meat The Next Intern

- A startup at CityU who invited me for a job shadowing
- Assisted the intern team with daily operations to improve efficiency."
- Facilitated a hands-on STEM class for children.

PERSONAL PROJECTS

- Created a personal AI chatbot with React.js and a locally hosted LLM, featuring conversation memory and knowledge retention.
- Built a full-stack AI agent in Python that uses tool calling to turn natural-language input into reminders and scheduled events, backed by FastAPI and PostgreSQL.
